NC Collections Firm Launches New Web-based Collection Service for Physicians

Winston-Salem, NC May 20, 2005—Computer Credit, Inc. (CCI), the Winston-Salem, NC-based medical collections firm, has launched a new online collection service, **MD-COLLECT™**. MD-COLLECT offers private practice physicians and other medical professionals a low cost collection service through an easy-to-use internet-based system.

The website, www.md-collect.com, is designed to make the collections process as simple as possible for busy private practices, dental offices, and other medical specialists. Medical practices using MD-COLLECT can submit delinquent self-pay accounts for \$7 per account referred and can access to account information and online reports 24 hours a day, 7 days a week. Unlike other medical collections services, physician groups using MD-COLLECT are not charged contingency or registration fees and are not required to submit a minimum number of referrals.

“MD-COLLECT provides a cost-effective solution that is convenient and easily accessible for the private physician practice market,” explains Beth Barksdale, President of CCI and MD-COLLECT. “One of the advantages of using MD-COLLECT is that the website circumvents the need for laborious, time-consuming efforts by office staff to collect self-pay dollars,” explains Barksdale.

CCI’s launch of MD-COLLECT was in direct response to private medical practices that need to collect from a small number of their patients in an economical and efficient manner.

Since 1972, CCI has produced significant collection results for the healthcare community. CCI was the first collection agency to form strategic business alliances with the nation’s leaders in health information systems. For over three decades, the capability to use CCI’s collection service has been integrated into most patient accounting products, allowing clients to receive a cost-effective collection solution. CCI is a licensed collection agency specializing in healthcare collections and serves major healthcare organizations and physician groups across the nation.
